See the difference multi-megapixel resolution makes!

Lumenera's Le11059 series of 11 megapixel cameras are designed for higher-end security applications, particularly in critical surveillance applications where intimate scene detail is required.

Streaming full 4008x2672 resolution at 5 fps, these cameras deliver outstanding picture quality and performance. Adjustable JPEG and MJPEG compressed still-images or streaming video are provided across a standard 10/100BaseT network interface.

Lumenera has simplified IP camera installation with a straightforward plug-and-play process. Intuitive user interface viewed with most browsers provides standard camera control.

The I/O connector provides an interface to an external alarm sensor or control of peripheral equipment such as; IR lighting, strobe and PTZ. Alarm notification provides the date, time and camera IP address.

Programmable day/night settings automatically switch to enhanced low-light mode. The monochrome camera variant is well suited for use with NIR illuminators, providing outstanding nighttime performance.

The user defined motion detection parameters across multiple zones provide more accurate triggering of alarms, while programmable privacy zones ensure compatibility with all regulations. On-board memory buffers supply still images that precede and follow alarm events. Transfer of images via email, FTP, RTP or HTTP.

Lumenera's Le11059 is provided with a larger SLR Canon Bayonet-Mount – to provide remote control of focus and iris through standard SLR lenses. Camera can be mounted stand-alone or by means of standard environmental enclosures. Call with your enclosure requirements today.
